A LITTLE YELLOW TAXI

Today, it is hard to drive a car in the centers of many big cities. It can take a long time to go from place to place because there are so many buses, taxis and other cars on the streets. However, in Goteborg, Sweden, there is a new way to get around the city center quickly. People can now ride in Taxi-pods.

- 5 Taxi-pods are little yellow taxis with only three wheels. They are perfect for short trips in the city center. They are very small and can drive through narrow side streets. That is why they don't have to drive on main streets where there is a lot of traffic.

There are other good reasons to use Taxi-pods. They help to keep the air clean because they work on a battery and not on gasoline. Also, people like Taxi-pods because they are not expensive to use.

- 10 A ride in one of them costs much less than a ride in a regular taxi. Finally, people also like Taxi-pods because they are fun to ride in and it is easy to find one in the city.
