

Part 1: Multiple Choice.

Choose the correct option for each question.

- **Which season typically has the longest days and the shortest nights?**
 - a) Spring
 - b) Summer
 - c) Fall

- **What is the phenomenon called when day and night are of approximately equal length?**
 - a) Solstice
 - b) Eclipse
 - c) Equinox

- **Which of the following is NOT a characteristic of winter in temperate climates?**
 - a) Snowfall
 - b) Short days
 - c) Blooming flowers

- **In which hemisphere does summer occur from December to February?**
 - a) Northern Hemisphere
 - b) Eastern Hemisphere
 - c) Southern Hemisphere

- **Which season is typically associated with harvest festivals?**
 - a) Spring
 - b) Summer
 - c) Fall

Part 2: Matching Words and Definitions.

Match each word related to seasons with its correct definition.

1. Solstice

a) A period when an animal remains inactive to conserve energy

2. Equinox

b) The longest or shortest day of the year.

3. Hibernation

c) The time of year when day and night are equal.

4. Bloom

d) Trees that shed their leaves annually

5. Deciduous

e) When flowers open and begin to grow

Part 3: Fill in the Blanks.

Complete the following sentences with the appropriate words:

<i>hibernation</i>	<i>spring</i>	<i>winter</i>	<i>deciduous</i>	<i>equinox</i>
--------------------	---------------	---------------	------------------	----------------

1. During the _____, many plants begin to bloom.
2. Animals like bears go into _____ during the winter to survive the cold.
3. The autumn _____ marks the beginning of shorter days and longer nights.
4. Leaves turn orange and yellow before they fall off _____ trees in autumn.
5. In the Southern Hemisphere, _____ occurs from June to August.

Part 4: Drag and Drop.

Drag the words to match each season with its typical weather and activities.

Spring	Summer	Fall	Winter

Part 5: Listening Comprehension.

Listen to this short audio about the seasons and answer the following questions:

Spring season is described as "a time of renewal"?

Yes	No
-----	----

Is the sun very strong in winter?

Yes	No
-----	----

In fall, do the leaves fall from the trees?

Yes	No
-----	----

Part 6: Reading Comprehension.

Read the paragraph below and answer the questions that follow.

Each season brings distinct changes to the environment. Spring is known for its blooming flowers and the return of migratory birds. Summer, with its long days, is ideal for outdoor activities. Fall is a time of harvest and preparation for colder months, while winter is marked by snow and shorter days in many regions. These changes not only affect the weather but also influence the behavior of animals and the routines of people around the world.

1- What is a common feature of spring mentioned in the paragraph?

2- Why is summer considered ideal for outdoor activities?

3- What happens during the fall season according to the text?

4- How does winter affect the daily routines of people?

5- List one way animals adapt to seasonal changes mentioned in the text.

Part 7: Speaking Practice.

Record your voice responding to the following prompts:

1- Describe your favorite season and explain why it is special to you. Mention any activities you enjoy doing

2- Compare two seasons of the year. Talk about their differences in weather, activities, and how they affect your daily life.

Part 8: Word search maker.

Find out the different words in the chart:
