

PUBLIC TRANSPORT

Around the world, there are many types of public transport: buses, trains, subways, trolleys, etc.

In Europe, it's very easy to get to know countries by train. In the USA and Canada, people can do that too, to travel between the countries. One can say that in big cities around the world, the subway is the most commonly used public transport, because it's very convenient and fast, connecting many districts to the downtown and vice versa. In the Netherlands, people use bicycles the most. In China, Japan and also India, bicycles are very much used. This is considered the best public transport, because it doesn't pollute the environment.
