Most people think of books as traditional paper books to read. However, there are many unique books around you. Let's learn about a few of these books.

## Books Travel!

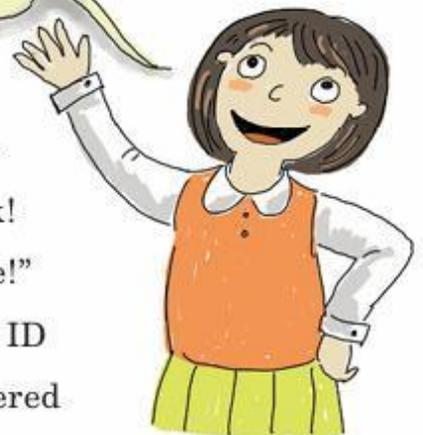

I found this old book on a park bench yesterday. A note on the cover read, "Free Book! Take me home and read me!"

Actually, this book had an ID number and was registered on a website. When I entered

the number online, I found out that the book had traveled to many countries and that a number of readers in different countries had read it before me. How was

that possible? **LIVEWORKSHEETS**

There is a book-sharing project.

First, register your book online and

- 3 get an ID number. Next, leave it in a  
public place. When the next reader finds  
your book and reports back to the website,  
6 you can check where your book is. This way,  
the whole world can become a big library. The  
more books we share, the more we learn.
