

Multiplication Stories

1. Judy bought 6 crates of oranges. Each crate contains 145 oranges in it. How many oranges are there in all?

Solution:

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Answer: _____

2. A dinner celebration is held at a community centre. There are 63 round tables with 8 chairs at each table. What is the total seating capacity?

Solution:

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Answer: _____

3. A bus going south of Cebu can fit 65 passengers in one trip. If each passenger needs to pay ₱38 for the fare, how much will they earn in one trip?

Solution:

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Answer: _____
