Fill in the blank with the correct words.

1. _____ is the attraction between water molecules and other materials, such as glass or plant surfaces.

2. _____ is the attraction between water molecules themselves, causing them to stick together.

3. Water molecules are _____, which means they have a partial positive charge on one end and a partial negative charge on the other.

4. _____ allows water to move up narrow spaces, such as the stems of plants, against gravity.

5. _____ is a property that results in water being an excellent solvent for other polar substances.

6. Water molecules form _____ bonds with each other due to their polarity.

Cohesion	adhesion	polar	Capillary action	hydrogen	polarity
