Module 1 – MESOZOIC ERA

Student:	

Did all dinosaurs live at the same time?

Listen to someone talk about the Triassic, Jurassic, and Cretaceous periods. Based on the audio choose the correct answer.

Mesozoic: *Large dinosaurs dominated the landscape, as well as flying reptiles in the sky. Plants with seeds spread and gigantic marine reptiles dominated the water. It is divided into three periods.*

PERIOD	*DESCRIPTION*
	Plant life was exuberant. Some dinosaurs of this period are Argentinosaurus, Triceratops, Tyrannosaurus rex, and Spinosaurus. Little rodents were all around. Insects were abundant. There was a mass extinction.
	There were huge plant-eaters like Brachiosaurus or Diplodocus, and carnivores such as Stegosaurus. In water, Plesiosaurs, giant marine crocodiles, and Ammonites were abundant.
	First little mammals and first dinosaurs.
