4 These *ear protectors* / *safety glasses* protect my ears.

Electricity: vocabulary

2) Label the pictures. Ponele el nombre a las imágenes según corresponda.

conductors (n)	insulators (n)	an electric current (n)	an atom (n)
electrons (n)	copper wire (n)	movement (n)	

3) Completa el texto. Lee con atención y tomándote tu tiempo

Fill in the gaps. Use the words from the box below. Use every word only once.

wires	open	electric device	terminals
circuits	battery	generators	closed
			current

A simple _____ always consists of two basic parts. First, we need a generator (for example, a _____) and an _____ (for example, a light bulb). Most of the time,

we also need two _____ to connect the two parts. Both _____ and electric devices have two _____. If these are connected in the right way, then the circuit is _____ and current can flow. If there is a gap in the circuit, it is _____, and no _____ can flow.
