Mother nature can be a bit scary at times. These days there seem to be more and more occurrences of natural disasters happening around the world.

An (1) _____ is the large movement of snow down the side of a mountain. They occur when the snow becomes too loose and as it slides down it mixes with air and water to cause a powerful and dangerous disaster. A drought happens when there has been no rain in a place for a long time.

A drought may result in a (2) _____; this is when there is not enough food to feed the people and they start to starve.

An earthquake occurs when the (3) _____ of the earth start to move and the ground begins to move and shake. The size of earthquakes is measured on the Richter scale.

A flood occurs when a large amount of water covers the land. Too much rain usually causes floods. As sea levels continue to rise, the risk of (4) _____ increases.

A hurricane originally means 'big wind'. Hurricanes are caused by low air pressure and thunderstorms and (5) _____ in strong winds and heavy rain. When they happen in the Atlantic Ocean we call them Hurricanes; however, they are called Typhoons when they happen in the Pacific Ocean.

A landslide happens on a slope like a mountain or a hill. The rocks and earth become loose and fall down the slope. When soil on the slope is wet, a (6) _____ may occur.

A tornado, which is casually known as a (7) _____, is a very large column of wind that spins around very quickly. The power of a Tornado can cause the winds to destroy houses and pick up and throw heavy items.

(8) _____ eruptions are caused by the plates of the earth moving and the pressure makes magma push up through the cracks in the earth.

II. Read the text carefully, then do the tasks.

Vietnam usually has a dozen storms every year from June through the end of November, and most of which occur in the Central and northern provinces. November 2nd, 1997, however, was an unexpected day when the major storm Linda raged in the South. Linda was the worst typhoon in Southern Vietnam over 100 years. Formed in the sea of the Philippines, Linda strengthened as it moved westward. Later, it struck extreme Southern Vietnam with winds of 100 kilometres an hour. Over 3000 people were reported lost and died. Ca Mau province, suffered a direct hit by the storm, had the most damage. Gusts and heavy rainfalls caused flooding, destroyed crops, damaged about 200,000 houses and left about 383,000 people homeless. Linda later struck Thailand, causing flash flooding and at least 164 deaths. The storm also affected Myanmar, Indonesia, Malaysia, and Cambodia to a lesser degree.

Today, residents in Mekong Delta still remember Linda after 20 years. The duration of the time is enough for a kid to grow up from an unforgettable event. The memory of a particular typhoon improves everyone's awareness of natural disasters.

A. Decide whether the following sentences are true (T) or false (F).

1. The tropical storm Linda hit northern Vietnam on November 2nd, 1997.
