

Name: _____

ATOMS 1

Put a check mark ☒ on your answer.

- All substances are made of small particles called ____.
a) molecules b) atoms c) cells d) elements
- Which one are Atoms not made up of ____?
a) protons b) neutrons c) electrons d) cells
- The center of the atom is called the nucleus. It is made up of which two?
a) protons b) neutrons c) electrons d) cells
- Which one has a negative charge?
a) protons b) neutrons c) electrons d) cells
- Which one has a positive charge?
a) protons b) neutrons c) electrons d) cells
- Which one has a neutral or no charge?
a) protons b) neutrons c) electrons d) cells
- Which of the three particles that make up an atom has the smallest mass?
a) protons b) neutrons c) electrons d) cells
- Which of the three particles orbits (circles) around the nucleus?
a) protons b) neutrons c) electrons d) cells

Look carefully at the diagrams

- How many electrons and neutrons are both in an atom of Boron?
a) 4 b) 5 c) 6 d) 7
