"A Busy Hospital"

The city hospital is a big place with many departments. There is an emergency room for serious cases, and there are three operating rooms for surgeries. In the pediatric ward, there are small beds for children and many colorful decorations to make them feel comfortable.

In the waiting room, there are a lot of chairs for patients and their families. There is also a pharmacy where doctors and nurses get the necessary medicine. Next to the pharmacy, there is a radiology department with X-ray machines and an MRI scanner.

Doctors and nurses work in different areas. In the intensive care unit (ICU), there are special machines to help critical patients. In the laboratory, there are many blood tests and other medical examinations. In every room, there is a hand sanitizer dispenser to keep everything clean.

Hospitals can be scary for some people, but they are important places where doctors and nurses work hard to take care of patients.

Activity 1: Read the sentences and choose TRUE or FALSE according to the information from the text.

1. There is one operating room in the hospital.
2. There are small beds for children in the pediatric ward.
3. The waiting room has no chairs for patients.
4. There is a pharmacy next to the radiology department.
5. There are no hand sanitizer dispensers in the hospital.

Activity 2: Match the items with the correct location in the hospital.
