5 **A** Anyone else care for some cake? We have three different kinds.
B That's great, I'll check it out.

Read about the results of a survey about gluten-free diets. Circle the questions that the survey asked. Answer the questions you circle.

Gluten-free diets seem all the rage nowadays. You can see gluten-free foods in supermarkets and restaurants. News about the gluten-free diets of movie stars and professional athletes is all over social media. But what do people really know about gluten-free foods? Our survey results have some surprises.

A majority of the people who responded said that being on a gluten-free diet improves physical or mental health. About 22 percent said they buy gluten-free products or try to avoid gluten.

A quarter of the people in the survey thought that gluten-free foods have more nutrients than food with gluten. The truth is just the opposite.

More than a third of the people interviewed thought that a gluten-free diet will help them lose weight. However, there is no research that proves this to be true. In fact, studies have shown that gluten-free diets can increase the risk of becoming overweight.
