

# KONVERSI $cm^2$ KE $m^2$

## SATUAN LUAS

$$cm^2 \xrightarrow{\substack{\text{Dibagi} \\ 10.000}} m^2$$

---

$$1m \times 1m = m^2$$

$$100cm \times 100cm = 10.000cm^2$$

---

$$10.000cm^2 = 1m^2$$

$$10.000cm^2 : 10.000 = 1m^2$$

$$\frac{10.000cm^2}{10.000} = 1m^2$$

Konversi satuan luas berikut:

a.  $50.000 \text{ cm}^2 = \underline{\hspace{2cm}} \text{ m}^2$

e.  $190.000 \text{ cm}^2 = \underline{\hspace{2cm}} \text{ m}^2$

b.  $60.000 \text{ cm}^2 = \underline{\hspace{2cm}} \text{ m}^2$

f.  $200.000 \text{ cm}^2 = \underline{\hspace{2cm}} \text{ m}^2$

c.  $70.000 \text{ cm}^2 = \underline{\hspace{2cm}} \text{ m}^2$

g.  $75.000 \text{ cm}^2 = \underline{\hspace{2cm}} \text{ m}^2$

d.  $20.000 \text{ cm}^2 = \underline{\hspace{2cm}} \text{ m}^2$

h.  $5.000 \text{ cm}^2 = \underline{\hspace{2cm}} \text{ m}^2$

i.  $2.000 \text{ cm}^2 = \underline{\hspace{2cm}} \text{ m}^2$
