

SECTION A: Reading Comprehension

Read the text and circle the correct option, true (T) or false (F).

The Olympic Games

Every four years, thousands of athletes from different countries compete in the Olympic Games, one of the most important sporting events in the world. The Games are divided into two editions: the Summer Olympics and the Winter Olympics, which take place two years apart. While the Summer Games include sports like swimming, athletics, and cycling, the Winter Games focus on events such as skiing, ice skating, and ice hockey.

Athletes must go through national and international competitions before they can participate in the Olympics. Only the best qualify for the event. Winning a medal is a great achievement, and gold medals are the most prestigious.

The Olympic Games have a long history. The first modern edition took place in 1896 in Athens, Greece, but the original Olympics began in ancient Greece over 2,000 years ago. Today, the event is watched by millions of people around the world on television and online, and it continues to unite countries through sports.
