Hi Ain,

How are you? Remember you have asked me about organic gardening and its benefit? So now I'm going to **(0)** sharing with you. No matter where you go today, people are talking about organic food. Organic gardening is the best way **(9)** from home gardening. It is an environmentally friendly way of gardening. Organic gardening **(10)** having lots of advantages. Firstly, organic gardening provides delicious chemical-free food while **(11)** respects the environment. An organic garden is free **(12)** for toxic chemicals like chemical fertilisers, pesticides and herbicides. The organic food items are rich **(13)** on nutritional values. Secondly, organic gardening uses **(14)** least natural resources especially water. The soil is fertilised through composting. This is good for the environment **(15)** until less waste is discarded. Furthermore, planting your own organic vegetable garden will **(16)** saving your money. That is something we all want to do. By growing your own vegetables, you will save money at the store and also can get a sense of fulfilment from harvesting your own garden. Happy gardening!
