

Most of us in developed countries have access new technology and many believe that it has improved the way we live. my opinion, however, technology has had a negative effect our lives. In schools, large numbers of pupils use tablets and laptops. I personally feel they are very distracting, as they prevent students concentrating on their lessons. Furthermore, reference sites the Internet discourage them thinking for themselves. Travel is another area in which technology has had a negative impact. **(RESPONSIBLE)** use of mobile phones in cars leads thousands accidents each year. **(FINAL)**, technology is responsible higher unemployment. Internet shopping has caused small shops to close because they cannot compete, and automatic checkouts in supermarkets have resulted cashiers becoming redundant.
