There weren't any airports in the past but now there is a new, big one. Now, it is easier to travel to other countries. There were lots of fields but now there aren't many. There are some small factories and a motorway there now. The motorway is very big so there aren't any traffic jams. Before the motorway, the roads were very busy. There weren't any lakes in the past but now there's a new lake in the middle of the city. It's not very big but it is nice to sit there and watch the ducks. There are also some rocks, where children play. Last year, a big farm with animals opened just outside the city.
