

You should be careful when sharing private/personal information about yourself and your family (address, phone number, credit card number, etc.), photos. Because everything shared stays there forever, and the information you share can be easily copied. You should make sure that the information you share is only available to a few people, because you don't know who can view it.

Tuğba Durak Demirhan

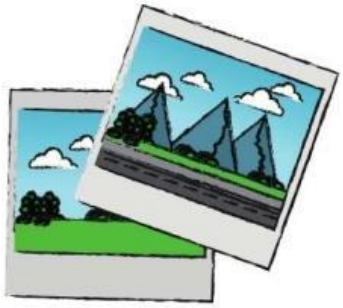

Which of the following photos can you share on the internet? Can you color the box of photos you can share?
