Once upon a time, there lived as neighbours, a bear and a rabbit. The rabbit was a good shot. In contrary, the bear was always clumsy and could not use the arrow to good advantage.

One day, the bear called over the rabbit and asked the rabbit to take his bow and arrows and came with bear to the other side of the hill. The rabbit was preventing to arouse the bear's anger so he could not refuse it. He consented and went with the bear and shot enough buffalo to satisfy the hungry family. Indeed he shot and killed so many that there was lots of meat left after the bear and his family had loaded themselves and packed all they could carry home.

The bear was very gluttonous and did not want the rabbit to get any of the meat. The rabbit could not even taste the blood from the butchering as the bear would throw earth on the blood and dry it up. The poor rabbit would have to go home hungry after his hard day's work.

The bear was the father of five children. The youngest child was very kind to the rabbit. He was very

hearty eater. The mother bear always gave him an extra large piece of meat but the youngest child did not eat it. He would take it outside with him and pretended to play ball with the meat. He kicked toward the rabbit's house and when he got close to the door he would give the meat with such a great kick. The meat would fly into the rabbit's house. In this way, the poor rabbit would get his meal unknown to the papa bear.

Albert Einstein is one of the most notable and influential scientists of the twentieth century. Although he became known as a genius of science and gained considerable fame later in life, as a child he was slow in learning to speak, and had a rebellious nature towards the conventional styles of learning at school. Inspired by a compass, his "sacred little geometry book", and classical music, his interest in science and mathematics grew and by the age of sixteen he was writing his first research science paper, and attempting to skip the last few years of high school to enter the Swiss institute of Technology. He failed the entrance exam but set a precedent in his life for thinking outside of the box and challenging the rules.

His most famous discovery is the theory of relativity, $E=MC^2$, which overturned Isaac Newton's laws by explaining the relation of energy and mass as a consequence of space and time. First introduced in a 3-page paper in 1905, the theory was so revolutionary it couldn't be proven until more advanced technology was available years later.

Born in Germany and raised in the Jewish faith, Einstein strongly opposed injustices of race and religion and often lent himself to the American civil rights movement and the efforts of the Zionist movement to preserve and cultivate the Jewish faith. He was instrumental in setting up the Hebrew University of Israel and was even invited to become Israel's second president, which he declined. Above all else Einstein maintained a non-nationalistic pacifist belief and urged for the disarmament of all nations and the formation of a one-world government. Often credited as the creator of the atom bomb, Einstein merely wrote a letter to President Roosevelt warning of Germany's possible use of nuclear weapons and was actually barred from participating in the United States' development of the atom bomb.

Albert Einstein is not only a world-renowned scientist who left an indelible mark on the world but also an icon of popular culture whose name and image have come to represent genius and intellect.

A stupid man was sent by his father to sell salt. First, He went to a mining area but nobody wanted his salt. When he returned home, his father told him that if he had helped the miners to dig, they would have bought his salt.

Next, the man went to a house where a wedding was taking place. There, he dug a huge hole. This made the people angry and they chased him away. When he returned home, his father told him that if he had beaten a drum and danced instead, the people would have bought salt from him.

Then, he went to a village where a fire happened. Rushing to the place, he started drumming and dancing, only to be thrown out by the people. His father told him that he should have poured water on the fire instead, if he wanted to sell the salt.

In the next place, a couple were fighting each other. The foolish man poured a bucketful of water on them, again he was chased away. His father later told him that he should have tried to settle the quarrel, so, they would have bought salt from him.

In the final event, the man saw two bulls fighting each other. He stepped in to stop the fight and was gored to death by angry bulls.

The hawksbill turtle is a critically endangered sea turtle found in tropical and subtropical oceans around the world. They are easily recognized by their distinctive overlapping scutes (scales) on their shell, which give it a serrated or "hawksbill" appearance. These turtles have a narrow, pointed beak, resembling that of a bird of prey.

Hawksbills are omnivores, feeding primarily on sponges, but also on other invertebrates like jellyfish and sea anemones. They play an important role in maintaining healthy coral reef ecosystems by controlling sponge populations. Their diet helps prevent sponges from overgrowing and smothering corals.

Hawksbill turtle populations have declined dramatically due to overharvesting for their shell (bekko), habitat destruction, and entanglement in fishing gear. They are protected by international laws, and conservation efforts are underway to protect their nesting beaches and foraging habitats.

How To Use A Toaster

Sometimes in the morning we want to enjoy some fresh and crispy bread.

The simplest way to do so is by using a toaster.

With toaster we can lightly cook slices of bread and make it tastier.

Here is step by step of how to make delicious bread by using toaster.

1. Insert a slice of bread into each toaster slot.
2. Choose the toasting level, usually it is from the lightest to the darkest. This will allow you to choose how dark the toast to be.
3. Wait until the toasting process finished, usually the process only takes a minute.
4. Pick the bread when the toasting process is finished and the bread pops up from the toaster slot. Then put it on a plate.
5. Pour some sugar on the bread while it is still warm or put some butter on it.
6. The toasted bread is ready.

Long ago, a king and a queen had a beautiful baby girl after many years of their marriage. They arranged a grand party to celebrate this happy occasion. They also invited three good fairies to bless the baby-girl. The first fairy said, "I grant you beauty." "I grant you sweet voice." wished the second fairy.

The third fairy was about to bless the baby when an evil fairy entered the room. As she was not invited, so she was very angry. She cursed the baby, "On your sixteenth birthday, you will die picking your finger on a spinning wheel!"

Everyone was shocked to hear this. They wept to hear the fate the baby-girl.

Then the third fairy said, "I can only change the curse. In place of dying, the princess will fall asleep for one hundred years. Then the kiss of a prince will break her long sleep."

The king ordered his soldiers to burn all the spinning wheels in the country. On her sixteenth birthday, the princess happily moved around the palace. She suddenly found a secret room where an old woman was spinning some yarn. She invited the princess to learn to spin. In a hurry, she pricked her finger and at once fell asleep for one hundred years. The good fairy also made all the people present in the palace asleep. This condition prevailed there for the next one hundred years.

Many years passed by, wild creepers and bushes covered the whole palace. Many young men tried to enter the palace. But they were not successful. They were dejected.

One day, a brave prince entered the palace. He found the sleeping princess and bent down to kiss her. At once, the princess opened her eyes and was delighted to see the prince.

The Prince married the Princess. And they happily lived for many more years.

Tōkyō tawā, officially called *Nippon denpatō* "Japan Radio Tower" is communication and observation tower in the Shiba-koen district of Minato, Tokyo, Japan. At 332.9 metres (1,092 ft), it is the second-tallest structure in Japan. The structure is an Eiffel Tower-inspired lattice tower that is painted white and international orange to comply with air safety regulations.

Built in 1958, the tower's main sources of income are tourism and antenna leasing. Over 150 million people have visited the tower. FootTown, a four-story building directly under the tower, houses museums, restaurants and shops. Departing from there, guests can visit two observation decks. The two-story Main Deck is at 150 metres (490 ft), while the smaller Top Deck reaches a height of 249.6 metres (819 ft). The names were changed following renovation of the top deck in 2018.

The tower acts as a support structure for an antenna. Intended for television broadcasting, radio antennas were installed in 1961, but the tower now broadcasts signals for Japanese media outlets such as NHK, TBS and Fuji TV. Japan's planned digital television transition by July 2011 was problematic, however; Tokyo Tower's height, 332.9 m (1,092 ft) was not high enough to support complete terrestrial digital broadcasting to the area. A taller digital broadcasting tower, known as Tokyo Skytree, was completed on 29 February 2012. Every five years Tokyo Tower is repainted. It takes one year to repaint it.

Since its completion in 1958, Tokyo Tower has become a prominent landmark in the city, and frequently appears in media set in Tokyo.

Global Warming

Global warming is the gradual increase in Earth's temperature due to the excessive release of greenhouse gases, such as carbon dioxide and methane. These gases trap heat from the sun, causing climate change. Human activities, such as burning fossil fuels, deforestation, and industrial pollution, contribute significantly to global warming.

The effects of global warming can be seen in rising sea levels, extreme weather conditions, and loss of biodiversity. To reduce global warming, people should use renewable energy, plant more trees, and reduce waste. Governments and organizations also work together to find solutions for this global issue.

49. What is the purpose of the text?
A. To explain the causes and effects of global warming
B. To describe a person who studies global warming
C. To tell a story about an environmental activist
D. To explain how to use fossil fuels efficiently
50. What is one way to reduce global warming?
A. Cutting down more trees
B. Burning more fossil fuels
C. Increasing industrial pollution
D. Using renewable energy
