

A decorative border of red ladybugs with black spots frames the entire page. The ladybugs are arranged in a rectangular pattern, with some on the top and bottom edges and others along the sides.

Sexually Transmitted Infections

Instructions: Read each statement and with your group, determine if it's correct or not. Write True or False and explain why.

1. STIs can only be spread through sexual intercourse.
2. Using a condom completely eliminates the risk of getting an STI.
3. You can have an STI without showing symptoms.
4. Only promiscuous people get STIs.
5. STIs can be cured with antibiotics.
6. STI tests are painful.

A decorative border of red ladybugs with black spots and antennae, arranged in a rectangular frame around the text.

7. The HPV vaccines can prevent some types of cancer.

8. STIs can only affect the reproductive system.

9. Regular STI testing is only necessary if you have symptoms.

10. STIs can lead to infertility if left untreated.
