

TV presenter Ben Miller is on his way to his first encounter with Pepper, a very special robot and the first of its \_\_\_\_\_. This is an android that can sense human \_\_\_\_\_. How are you? I'm super good. Thanks.

And you? I'm really happy to talk to you. Can you see how happy I am? I'm looking at you. This allows Pepper to be a \_\_\_\_\_. of companionship and emotional support for humans.

I don't feel so happy anymore. Now I'm angry. Oh, ow. Pepper is designed to learn from experience and will \_\_\_\_\_. a personality over time. I'm intrigued to find out more about my little mechanical friend from the chief \_\_\_\_\_. officer, Rodolphe Galen.

No. That's it. That's another robot. Here's Rodolphe. I'm really inspired by this place.

I mean, I've never seen anywhere \_\_\_\_\_. like it. Whose idea was Peppa? This is the idea of Bruno Maisonnier. Bruno Maisonnier was, is an engineer who, used to work in the bank, but during the night, he was working on robots because since he was a little \_\_\_\_\_, he really loved robots. Can we talk about the software?

He uses sensors, vision sensor mainly Yeah. To detect on your \_\_\_\_\_. if you're smiling, if you're, you know, if you're sad. 20 electric motors, an Intel Atom based computer, two cameras, and a 3D sensor. They all work \_\_\_\_\_. to create one of the world's most advanced robotic artificial intelligences. I can't wait to see what Peppa's capable of.

Pepper's not \_\_\_\_\_. to tackle the chores, but is designed as an emotional companion. As Pepper learns more about us, it adapts its

\_\_\_\_\_, enabling us to share engaging and stimulating conversations. Hi. I would like to play a game. I love to play.

We can play a guessing game. Is it a girl? No. Does your \_\_\_\_\_ live in America? No.

Is your character linked with sports? No. Is your character a singer? Yes. Alright.

Is your character currently more than 40 years old? Yes. I'm

.... Is your character Canadian? Yes.

Alright. It's Michael Bubbly. Yes. But Pepper can do more than just play games.

Whether performing a \_\_\_\_\_. facing role or as part of a household, Pepper is always there to engage with people and make them feel good.

For the first time, I feel like I've met a robot that, lives \_\_\_\_\_. to the dream of what a robot might be. It's true that unlike some other robots, Pepper doesn't look much like a human, which studies show \_\_\_\_\_.

trust. But what Pepper the robot lacks in looks, it makes up for in personality.
