

Half Trend indicator for MetaTrader 4 Download - Free - [Trading Finder]

The **Half Trend Indicator** for **MetaTrader 4 indicator** efficiently displays market trend directions. The indicator uses a **main trendline** to show whether the market is uptrend or downtrend. When candles stabilize below the trendline, the line turns **red** (indicating a downtrend), and when candles stabilize above the trendline, the line turns **green** (indicating an uptrend). Additionally, the indicator confirms the direction of price movements using **uptrend and downtrend signals**, helping traders make better decisions and identify optimal entry and exit points.

Indicator at a Glance

The **Half Trend Indicator** informs traders about the **market trend** by displaying **buy** and **sell signals**. Traders can use this indicator to identify the **market trend** and utilize its signals to **enter** or **exit** trades.

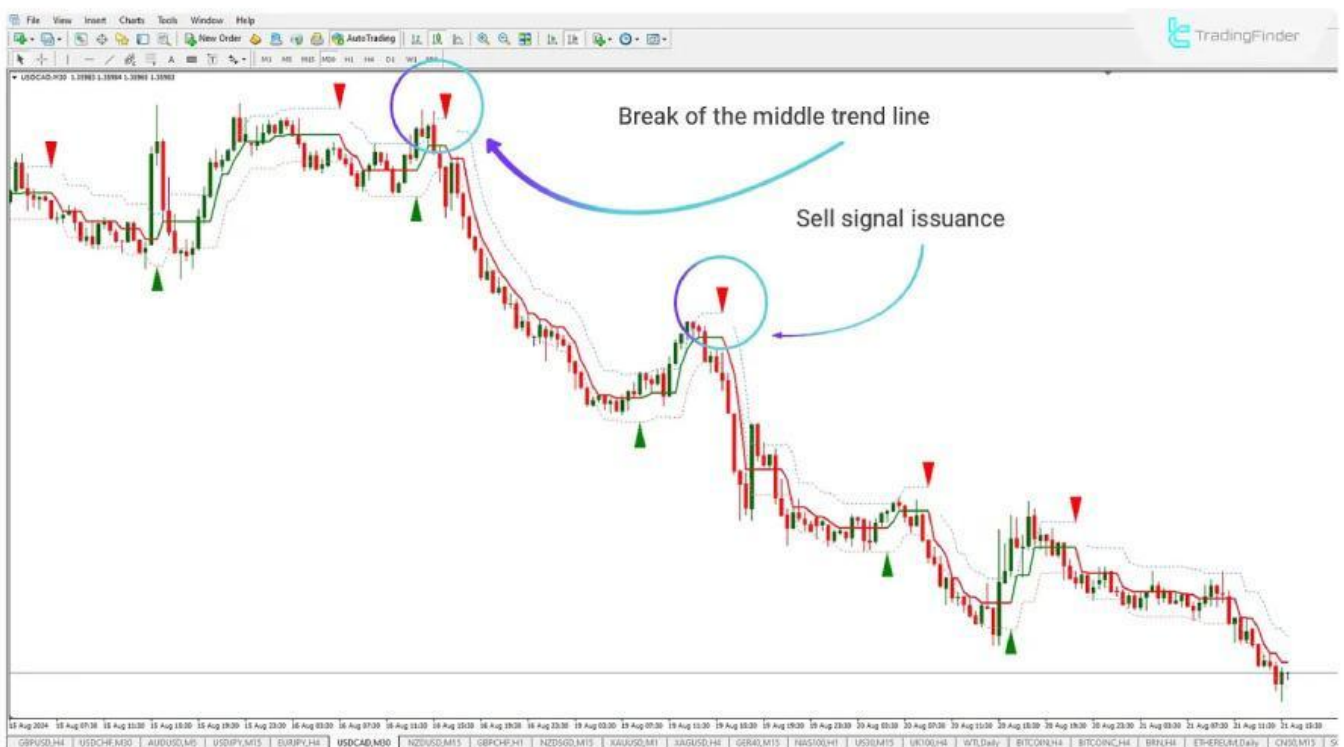

Uptrend Signal

1-minute Gold (XAUUSD) chart

In the **1-minute Gold chart**, after the **half-trend indicator's** middle line is broken to the upside, the trendline turns **green**, issuing a **buy signal** on the chart. Traders can use this color change and signal to enter **buy trades** and capitalize on bullish market movements. This signal confirms that the market trend has shifted, and the likelihood of price moving upwards has increased.

Downtrend Signal

30-minute USD/CAD chart

In the **30-minute USD/CAD chart**, after the middle line of the **Half Trend Indicator** is broken to the downside and two candles stabilize below the trendline, the line changes to **red**. This color change indicates a **sell signal**, alerting traders that the market is downtrend. Traders can use this sell signal by entering **sell trades** and benefiting from the potential price decline.

Half Trend Indicator Settings

4-hour GBP/USD chart

- ⚡ **Amplitude:** Set the amplitude or period;
- ⚡ **Channel deviation:** Set the channel deviation;
- ⚡ **Show Arrows:** Enable or turn off arrow displays;
- ⚡ **Show Channel:** Channel display setting;
- ⚡ **Buy color:** Set the color for buy signals;
- ⚡ **Sell color:** Set the color for sell signals.

Summary

The **Half-Trend Indicator** is a powerful tool for detecting market trends. It helps traders look for trend changes and **buy/sell signals**. The **MT4 Band and channel indicator** provides **green signals** for buy trades and **red signals** for sell trades, helping traders easily identify uptrends or downtrends. The **Half-Trend Indicator** offers precise information about optimal entry and exit points, helping traders make better decisions in their trades.
