LISTEN IT, AND WRITE THE CORRECT ANSWER

Warm air 1..... and then cools down

Vapor it holds these water droplets form clouds

High clouds are made of 2.....

Lower down, water drop particles

Cirrus clouds

3....., thin and wispy, good weather out

Cirrostratus, sheetlike, high and flat, looks 4.....

5..... rain, coming the next day

And cirrocumulus, small cotton ball-like puffs

That also are high up, like 6..... they look

Cumulonimbus, they're clouds of 7.....

Vertical growth, growth, growth

**** Warm air rises then cools down**

Many water droplets gather round

Small and light the stay 8..... about

Collection of these droplets forms a cloud

And cirrus, high up, stratus, blanket

Cumulus, puffs 9.....

And nimbus means, there's a storm to come

Status clouds, low, flat, cover the whole-sky

Weather out is 10..... rain light

Cumulus, rounded, white, puffy

Develops on days that are 11.....

Alto cumulus, gray and with patches in round masses

Nimbostratus dark, thick and gray, they're 12..... rain

Spanning large space, mid to low layers

Stratocumulus, it's like you took a 13.....

And 14. the cross the sky

Low puffy, gray or white

Then altostratus, mid-level covering

15..... gray, they're gray, they are gray
