## PRE-READING

Guess the meaning of the following words, using the given context:

<p>In today's world, many people have <b>a strong desire</b> to follow the latest fashion trends, always looking for <b>up-to-date</b> styles that reflect current tastes. However, the fashion industry's <b>practices</b> are often harmful to the environment, as mass production leads to excessive waste. For those working in the <b>profession</b>, like designers and brand owners, this presents a challenge. Some, after experiencing the environmental impact <b>first-hand</b>, feel the need to make a change. Yet, they often face <b>a personal dilemma</b>—how can they create new clothing while also reducing waste? Many have <b>ambitions</b> to make fashion more sustainable, and one solution is introducing <b>a 'take-back' programme</b>, where customers return unwanted clothes so they can be reused or recycled. While these efforts may not solve all the industry's problems immediately, they are a way to <b>make a start</b> toward a more responsible future.</p>	<ol style="list-style-type: none"> <li>1. a strong desire</li> <li>2. up-to-date</li> <li>3. practices</li> <li>4. profession</li> <li>5. first-hand</li> <li>6. a personal dilemma</li> <li>7. ambitions.</li> <li>8. a 'take-back' programme</li> </ol>
