

Dynamic Trader Oscillator (DTO) indicator for MT4 Download - Free

The **Dynamic Trader Oscillator** is an advanced tool combining **RSI** and **Stochastic** in **MetaTrader 4 indicators**, providing traders with higher accuracy in trend analysis and price **reversal points**. Developed for the MetaTrader 4 (MT4) platform, this oscillator displays **buy** and **sell signals** for traders.

When the oscillator line (**blue**) crosses the signal line (orange) up or down, buy and sell signals are respectively issued on the chart. This feature makes the Dynamic Trader Oscillator an efficient tool for decision-making in trading positions, helping traders correctly identify optimal entry and exit points.

Oscillator Table

Category	Oscillator - Signal and Prediction - Trading Tool
Platform	MetaTrader 4
Skill Level	Beginner
Indicator Type	Lagging - Strength - Leading
Time Frame	Multi-time frame
Trading Style	Scalping - Day Trading - Intraday Trading
Markets	Forex - Cryptocurrencies - Indices

Indicator at a Glance

The **Dynamic Trader Oscillator** is a practical tool for analysis using indicators. This oscillator combines the **RSI** and **Stochastic** indicators with the Stochastic overlaid on the RSI.

When the Stochastic reaches the **overbought** or **oversold** zones within the RSI, these points are identified as potential price reversal signals. Additionally, the indicator provides buy and sell signals.

A **buy signal** is generated if the oscillator line (blue) crosses above the signal line (orange) from below. Conversely, if the oscillator line crosses below the signal line from above, a **sell signal** is issued, indicating a potential start of a bearish trend.

Buy Signal in Oscillator

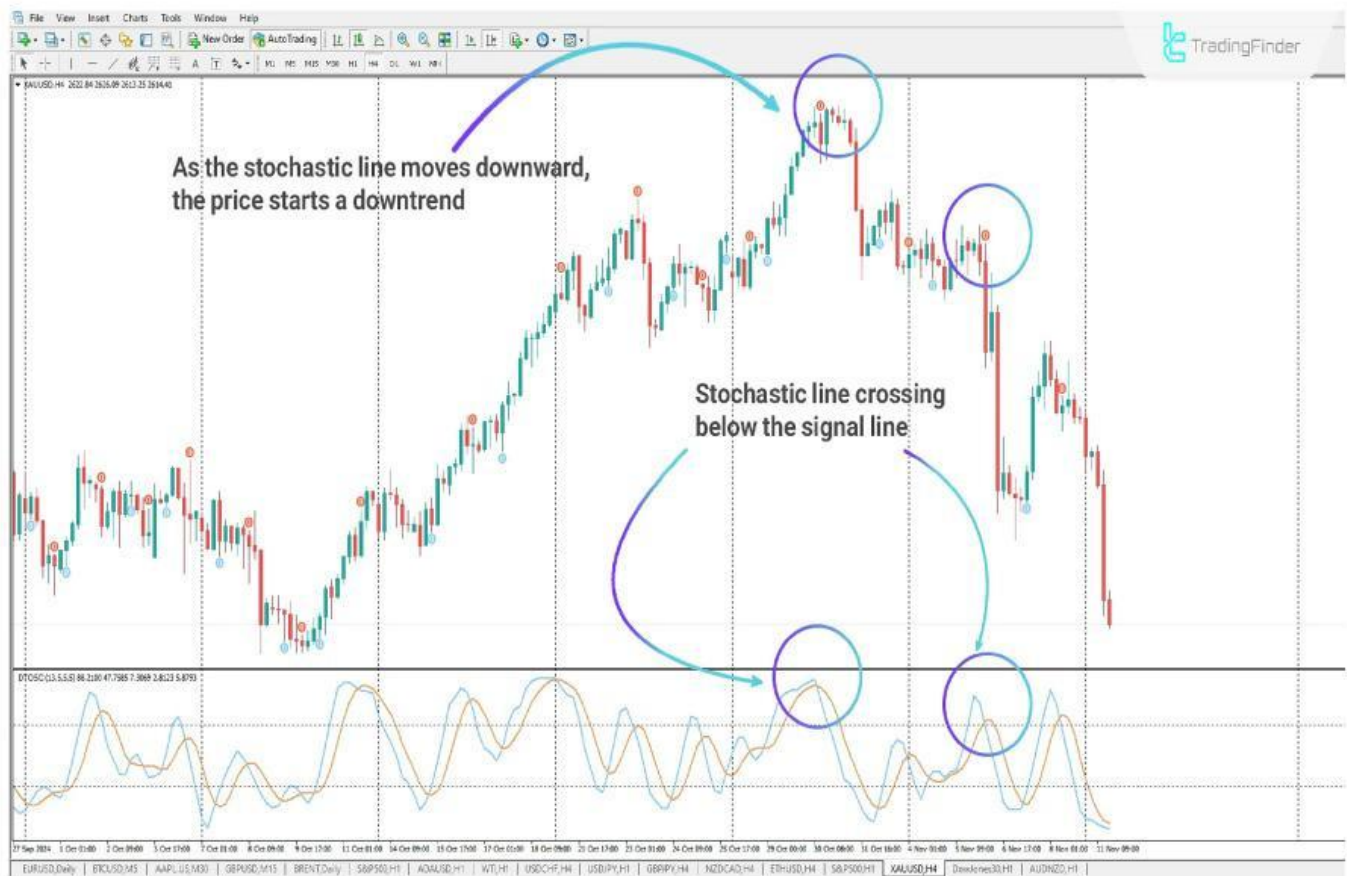

GBP JPY 4-Hour Chart

In the **4-hour GBP/JPY** chart, the **Dynamic Trader Oscillator** has issued a **buy signal**. When the oscillator line (blue) crosses the **signal** line upward, a buy signal is displayed with blue markers on the chart. After issuing this buy signal, the price enters a **sharp** upward trend.

Traders can use the opportunity to enter a trade when the **Stochastic** reaches the **oversold** area on the RSI and a buy signal is issued simultaneously.

Sell Signal in Oscillator

XAUUSD 4-Hour Chart

In the **4-hour XAUUSD** chart, the **Dynamic Trader Oscillator** has issued a sell signal. When the oscillator line (**blue**) crosses the signal line downward, a **sell signal** is displayed with red markers on the chart. After issuing this sell signal, the price enters a sharp downward trend.

Traders can take the opportunity to enter a trade when the **Stochastic** reaches the **overbought** area on the **RSI** and a sell signal is issued simultaneously.

Conclusion

The **Dynamic Trader Oscillator** is a developed and advanced indicator combining the popular **RSI** and **Stochastic** indicators. This oscillator is displayed in the RSI window, which provides a substantial advantage for traders.

When the Stochastic oscillator reaches the **overbought** or **oversold** areas on the RSI, it can be considered a trend reversal warning. Furthermore, this **Trading Assistant MT4 indicator** issues buy and sell signals when the oscillator line crosses the Stochastic signal line, alerting traders to trading opportunities.
