

# ANIMAL AND PLANT CELLS

Identify the structure of the cells and name the cells

The diagram shows two cells side-by-side. The plant cell on the left is rectangular with a thick green cell wall and a large blue central vacuole. The animal cell on the right is irregularly shaped with a thin blue cell membrane and a large orange nucleus. Various organelles are shown in different colors and connected to empty boxes for labeling.

Labels for the plant cell (left):

- Top-left box: Cell wall
- Top-middle box: Nucleus
- Middle-right box: Central vacuole
- Bottom-right box: Chloroplast
- Bottom-left box: Cell membrane

Labels for the animal cell (right):

- Top-right box: Cell membrane
- Middle-left box: Nucleus
- Bottom-right box: Mitochondrion

Large empty boxes at the bottom for the names of the cells:

- Left box: Plant cell
- Right box: Animal cell
