

Homes come in all shapes and \_\_\_\_\_.

They can be built in all sorts of \_\_\_\_\_, some can even move to different locations.

If you look at some of these, you might think they were fantasy, but... and they are all real homes.

They show how \_\_\_\_\_ meet the challenge of building homes in different locations and spaces.

Many cities around the world have growing populations.

If designers don't \_\_\_\_\_ up with new ideas, then there might not be enough homes for everyone.

The big challenge is to create ways of living in \_\_\_\_\_ spaces.

Luckily, some designers are enjoying the... \_\_\_\_\_ of designing homes for smaller spaces. Let's take a look at some.

Traditional homes have different \_\_\_\_\_ for different purposes.

Here a single space has multiple uses.

The sitting area becomes the bedroom, a dining table rises out from a \_\_\_\_\_.

There's your desk, when you want a \_\_\_\_\_ bed, just come straight out like that.

Some of these ideas are not \_\_\_\_\_, but the designer has made saving space very stylish.

It is not just furniture that can \_\_\_\_\_ or have more than one purpose.

The whole apartment rotates, why? because that makes use of the space in every dimension, all at the touch of a \_\_\_\_\_.

Does everyone buys the housing and how \_\_\_\_\_ is it? What's the square foot?

Now we're talking cubic feet or meters, because now we're... giving it a three-dimensional space in just instead of just floor space, so floors can become \_\_\_\_\_ that then can become ceilings, depending on which way round the rotating house is.

This is not a home for an \_\_\_\_\_ person.

Most things in the home need to be fixed down from the \_\_\_\_\_ to the knives and forks.

Hong Kong, living costs are some of the most \_\_\_\_\_ in the world.

It is difficult for young people to find... homes they can afford.

The pit stop is designed to meet the challenge of \_\_\_\_\_ homes young people can afford and enjoy. They are small.

The designers use every bit of space, but also consider the residence lifestyle.

My favorite feature of this flat is the openable bookcases, uh, not just the book case is operable, but it actually functions as an operable b'.

Yeah, operable boundary, just a minute, what did they say, operable boundary?

What does that mean?

Well, it means not having a fixed wall separating the inside

\_\_\_\_\_ from the outside, operable boundary between the interior and exterior of the flat, and by merging the two, the private space in the public space, we can actually share a common area with our neighborhoods, or we can.

Invite guests to come and play with bars.

It means the apartment does not need \_\_\_\_\_ for a large number of people to meet inside.

When the residents want to meet a group of friends, they can literally have an

\_\_\_\_\_ house, but sometimes the joy of a good home is just being in your own space, however large or small.
