Immediate Rebalance Indicator in TradingView - Free - [Tradingfinder]

The **Immediate Rebalance Indicator** is an advanced tool based on **ICT (Inner Circle Trader)** trading concepts, focusing on rapidly filling price gaps.

Unlike **Fair Value Gaps (FVG)**, Immediate Rebalance zones represent **instant equilibrium** in the market. The zones drawn by this **ICT TradingView indicator** do not require a price retracement; instead, they **strengthen** the prevailing trend.

Performance in Bullish Trends

An analysis of the 4-hour price chart for **Ethereum (ETH)** demonstrates how the Immediate Rebalance zone is formed and how the price reacts to it.

As shown in the image, the indicator considers three candles and plots the shadow of the first candle as the **Immediate Rebalance Zone**.

The overlap of the third candle's shadow with the zone represents an immediate rebalance, **strengthening** the prevailing trend. In such **conditions**, the return of the price to the Immediate Rebalance zone presents an excellent **opportunity** for **Long (Buy) trades**.

Performance in Bearish Trends

The 15-minute price chart of the **GBP/USD** currency pair illustrates how the indicator identifies and reacts to Immediate Rebalance zones.

The indicator considers three candles and plots the **shadow** of the first candle as the **Immediate Rebalance Zone**.

The overlap of the third candle's shadow with the **zone represents** an immediate rebalance, strengthening the prevailing trend.

In such conditions, the return of the price to the Immediate Rebalance zone presents an **excellent** opportunity for **Short (Sell) trades**.
