FVG & IFVG Indicator for MT4 Download - Free - [TradingFinder]

The **Fair Value Gap** and **Improved Fair Value Gap (FVG & IFVG)** indicator in MetaTrader 4 is an **ICT indicator** that combines two important **liquidity zones**.

Fair Value Gaps typically form after rapid price movements, where due to significant volatility in certain areas, prices don't fill. Hence, prices tend to return to these areas. **Improved Fair Value Gaps (IFVG)** are formed similarly, but these zones change roles (Fillip) after a breakout.

Indicator Specifications Table

Category	ICT - Smart Money - Liquidity
Platform	MetaTrader 4
Skill Level	Advanced
Indicator Type	Trend-following - Reversal - Breakout
Timeframe	Multi timeframe
Trading Style	All styles
Market	Forex - Cryptocurrency - Stocks

Indicator Performance in Bullish Trend

According to the **AUD/USD** price chart in the 4-hour timeframe, the **bearish IFVG** zone changes from red to green after being broken by the trend. In such conditions, the zone changes its role from resistance to support, and after the price returns to this zone, it creates a suitable opportunity to enter **buy positions (Long Position)**.

LIVEWORKSHEETS

Indicator Performance in Bearish Trend

As seen in the **Polkadot (DOT)** price chart in the 1-hour timeframe, the **bullish IFVG** zone changes from green to red after being broken. Its role switches from a support zone to a resistance zone. As
