Platform	MetaTrader 4
Skill Level	Advanced
Indicator Type	Continuation - Reversal
Timeframe	Multi-timeframe
Trading Style	Intraday Trading
Market	Cryptocurrency - Forex - Stocks - Commodities

Composite Indicator in an Uptrend

The following image displays the price chart of the British Pound against the Japanese Yen (GBP/JPY) in a 5-minute timeframe. The indicator identifies the Change of Character (CHoCH) pattern and marks it on the chart. After the CHoCH and price breakout, a suitable opportunity for long (buy) trades arises.

Composite Indicator in an Uptrend (GBP/JPY)

Composite Indicator in a Downtrend

The following image shows the **price chart of the British Pound against the US Dollar (GBP/USD) in a 4-hour timeframe**. Based on the image, the **indicator detects CHoCH and a false breakout (SFP) and plots them on the chart**. The **price crossing the "CHoCH" zone** and **confirming the false breakout (SFP)** creates a **favorable entry point for short (sell) trades**, indicating a **continuation of the downtrend**.
