

Implied Fair Value Gap Indicator MT4 Download - Free - [Trading Finder]

The **Implied Fair Value Gap (Implied FVG)** indicator on MetaTrader 4 identifies price gaps that are not visible on the chart.

This **MT4 ICT indicator** considers two hypothetical lines at **50%** of the shadows of adjacent candles for each middle candle; the area between these hypothetical lines is termed the hidden fair value gap.

If one of the adjacent shadows completely overlaps the other, a **hidden fair value gap** does not form.
