## Introduction to the Crypto Profit Calculator in TradingFinder

The Crypto Profit Calculator estimates the **profit** from investing in a cryptocurrency based on several parameters. The outputs of this tool include **profit/loss, total deposit amount,** and **final amount** Note that TradingFinder also provides a **Forex profit calculator** tool

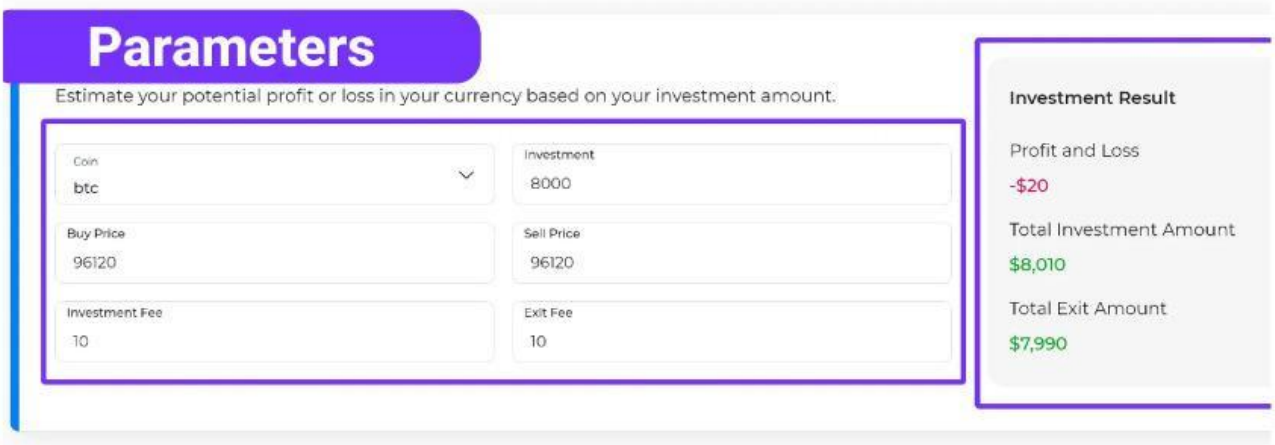

## Review of the Input and Output Values of the Calculator

This **free** tool operates based on the following values:

| Parameter | Description |
|---|---|
| **Coin** | The cryptocurrency selected for investment |
| **Investment** | The amount of capital invested in the cryptocurrency |
| **Buy Price** | The price of the selected cryptocurrency at the time of investment |
| **Sell Price** | The current value of the chosen cryptocurrency |
| **Investment Fee** | The transaction fee paid for purchasing |
| **Exit Fee** | The transaction fee for selling |
| **Profit and Loss** | The profit or loss from the trade |
| **Total Investment Amount** | The total capital input by the trader, including the buying fee |
| **Total Exit Amount** | The trader's capital after selling the cryptocurrency based on the entered values |

The image below shows the tool's parameters.

A look at the input and output values in the TradingFinder Crypto Profit Calculator

## How Does the TradingFinder Crypto Profit Calculator Work?

This **TradingFinder** calculator works based on the following formulas:

- **Profit/Loss** = (Number of Bought Coins × Sell Price) – Investment – (Investment Fee + Exit Fee)
- **Final Amount** = (Number of Bought Coins × Sell Price) – Exit Fee
- **Number of Bought Coins** = Investment / Buy Price

## How to Use the Crypto Profit Calculator Tool

To use this calculator, follow these steps:

1. Select a **cryptocurrency** from the menu;
2. Enter the **investment**, **buy price**, **investment fee**, and **exit fee**;
3. The **sell price** of the selected cryptocurrency will automatically appear in the tool, but you can enter your preferred price manually;
4. After completing the above steps, the **results** will be displayed.
