

Listening

The Cost of Convenience

Listen to the audio. Which of these ideas were clearly mentioned in the monologue? Tick them.

1. People stop using their own imagination when they rely too much on AI.
2. AI might replace teachers in the future as it adapts to each student.
3. Creative skills like drawing and music can weaken if we let AI do everything.
4. Songs written by AI may sound good, but they don't tell our personal stories.
5. Using AI helps improve grammar and vocabulary quickly.
6. AI reduces face-to-face social interaction – people spend less time talking to real people.
7. AI always adds personal emotion to songs and poems.
8. When AI solves everything, people stop learning how to work through problems on their own.
9. AI can lead to health problems, like headaches from screen use.
10. Depending too much on AI can make us impatient.
11. AI can help shy people express themselves better.
12. Personal messages written by AI don't feel real or meaningful.
13. Some people start to believe their own work isn't good enough.
14. AI blocks people from expressing their true thoughts and feelings.
15. AI makes it easier to cheat on school exams and spread fake news.
