Question 4: A.before B.while C.so D.if

Question 5: A.on B.in C. to D.about

Question 6: A.should B.might C.must D.will

III/ Read the passage and choose the correct answer to each of the following questions.

1. Deep beneath the ocean's surface, there are amazing underwater cities that are rich in life. They have been around for millions of years and they hold communities of ocean creatures that live there. These "cities" are coral reefs.

2. Coral reefs are not just beautiful; they are incredibly important for our planet. Coral reefs are home to a lot of marine creatures, including colorful fish and turtles. Coral reefs also help protect our shores. They act

as natural walls, stopping big waves and storms from reaching the land. This is important because it prevents our beaches from eroding away.

3. Sadly, coral reefs are in danger. The oceans are getting warmer because of climate change. This makes coral reefs lose their color and food. Water pollution, fishing with dynamite, as well as the careless collection of coral, also destroy coral reefs.

4. If we don't take action, all the reefs will die in around 20 years. This will lead thousands of sea creatures to extinction. We can help save the world's coral reefs by joining an environmental organization like Reef Relief. It's worth a try!

Question 1: According to passage, coral reefs _____.

- A. are worth a lot of money B. mainly consist of fish species
C. have existed for millions of years D. float on the ocean's surface

Question 2: The word "incredibly" in paragraph 2 is closest in meaning to _____.

- A. extremely B. normally C. luckily D. simply

Question 3: The word "They" in paragraph 2 refers to _____.

- A. shores B. walls C. marine creatures D. coral reefs

Question 4: Which is NOT mentioned as a threat to coral reefs?

- A. warmer oceans due to climate change B. careless collection of coral
C. water pollution D. overfishing of sharks

Question 5: What might happen to marine creatures if coral reefs disappear?

- A. They will become more colorful. B. They will move to colder waters.
C. They will face the risk of extinction. D. They will form new ecosystems.
