Trading Style	Scalping - Intraday - Medium term - Long term
Market	Forex - Stocks - Commodities

Easy Trade Manager Expert

The **"Easy Trade Manager"** expert sets **Stop Loss** and **Take Profit levels** and calculates the Risk-to-Reward ratio.

By entering the desired values in the **expert's panel**, a position can be opened at the current market price, and the Stop Loss and Take Profit levels will **automatically** be set according to the **entered** values.

In addition, in the **"Buy P & Sell P"** mode, the possibility of creating a **Pending** position on the chart has been provided.

Buy Position

In the **Uniswap cryptocurrency** chart at the **30-minute time frame**, the trade position's volume is **0.1 lots**, and the **Risk to Reward ratio** is calculated as **2**.

Based on the entered values, the Easy Trade Manager Expert draws the **Stop Loss level** with a **red** dashed line and the **Take Profit level** with a **green** dashed line on the chart.

Pressing the **"B" button** makes the position as "**Risk-Free.**" Additionally, depending on the trader's **strategy**, the trader can exit **50%** of the position by selecting the **"P" option**.

Functionality of Easy Trade Manager Expert in Buy Trading Position

Sell Position

The 4-hour **Bitcoin (BTC)** chart demonstrates how the **Easy Trade Manager Expert** functions in a sell position.

The volume set in the expert's panel is **0.1 lots**, and the **Risk to Reward ratio is 2**. The Stop Loss and Take Profit levels are drawn on the chart according to the specified values.

Functionality of Easy Trade Manager Expert in Sell Trading Position

Easy Trade Manager Expert Settings

The image below contains details related to the settings and main panel of the Easy Trade Manager Expert:

Easy Trade Expert Settings in MetaTrader 4
