Linear Regression Channel [TradingFinder] Existing Trend Line by TFlab

[TradingView.com](#)

The **Linear Regression Channel Indicator** is a useful tool among **TradingView Indicators** that helps identify **Support Levels**, **Resistance Levels**, and analyze **Uptrends** and **Downtrends**.

This indicator consists of **5 main components**:

1. **Middle Line**: Represents the **linear regression line**, indicating the **overall market trend**;
2. **First Support Line**: Located **below the middle line**, acting as the **initial support level**;
3. **Second Support Line**: Positioned **below the first**, indicating a **stronger support level**;
4. **First Resistance Line**: The initial resistance level is located **above the middle line**;
5. **Second Resistance Line**: Above the first resistance line, representing a **stronger resistance level** in the market.

Indicator Specifications Table

The table below summarizes the features of this indicator:

Category	ICT - Smart Money - Signals and Forecasting
Platform	TradingView
Skill Level	Beginner
Indicator Type	Continuation - Reversal
Time Frame	Multi Time Frame
Trading Style	Intraday Trading
Market Type	Cryptocurrency - Forex - Stocks - Commodities

Indicator in Uptrend

In a **4-hour price chart** of an **oil index**, the **Middle Line** has a **positive slope**, and prices fluctuate **between the middle and resistance lines**.

Traders initiate buy trades after **breaking the middle line** and approaching the **second support line**.

Depicting the middle line breakout and price reversal in the Linear Regression Channel Indicator.

Indicator in Downtrend

In a **descending channel** of the **AUD/USD** pair, the **Middle Line** has a **negative slope**, and prices oscillate **between the resistance and support lines**.

Approaching these **second resistance lines** could act as a **reversal zone**. Traders can enter **sell trades** after observing **Doji Candles** and **necessary confirmations**.

Price hitting the second resistance zone and reversing in the Linear Regression Channel Indicator.

Indicator Settings

The following image illustrates the **indicator's specifications**:

Displaying Linear Regression Channel Indicator settings for the GBP/USD pair.
