TradingFinder Interest Rate Tool

TradingFinder's interest rate tool shows **current central bank borrowing rates**, **previous figures**, and **change amounts** with two decimal places.

Additionally, the **next meeting date** for each central bank is specified, and as soon as the meeting is held and the result is announced, **the interest rate on TradingFinder is updated**.

What is Interest Rate?

"Interest Rate" is **the amount of profit that a bank pays to investors for deposits**. Central banks worldwide use this concept to **control inflation, economic growth, and increase** or **decrease of currency values**; thus, interest rates directly impact **financial markets** [cryptocurrency, forex, stocks, etc.], **demand levels**, and **volatility**.

Using TradingFinder's interest rate tool, you'll stay informed about the latest interest rate changes of all central banks.

What are the Applications of TradingFinder's Interest Rate Tool?

TradingFinder's interest rate tool shows all necessary information related to interest rates.

Applications of the Interest Rate tool:

- **Current Interest Rate**: The current interest rate is displayed with **two decimal places**, **green** or **red** color [for **decrease** or **increase**], and an **upward** or **downward arrow**.
