8

Let's practice vocabulary! Listen to these words touching on the **speaker**  Then, write the words correctly.

9

Complete this equation.

Water +

+ light and energy from the sun +

= food +

10

Guess the key word about photosynthesis following the clues.

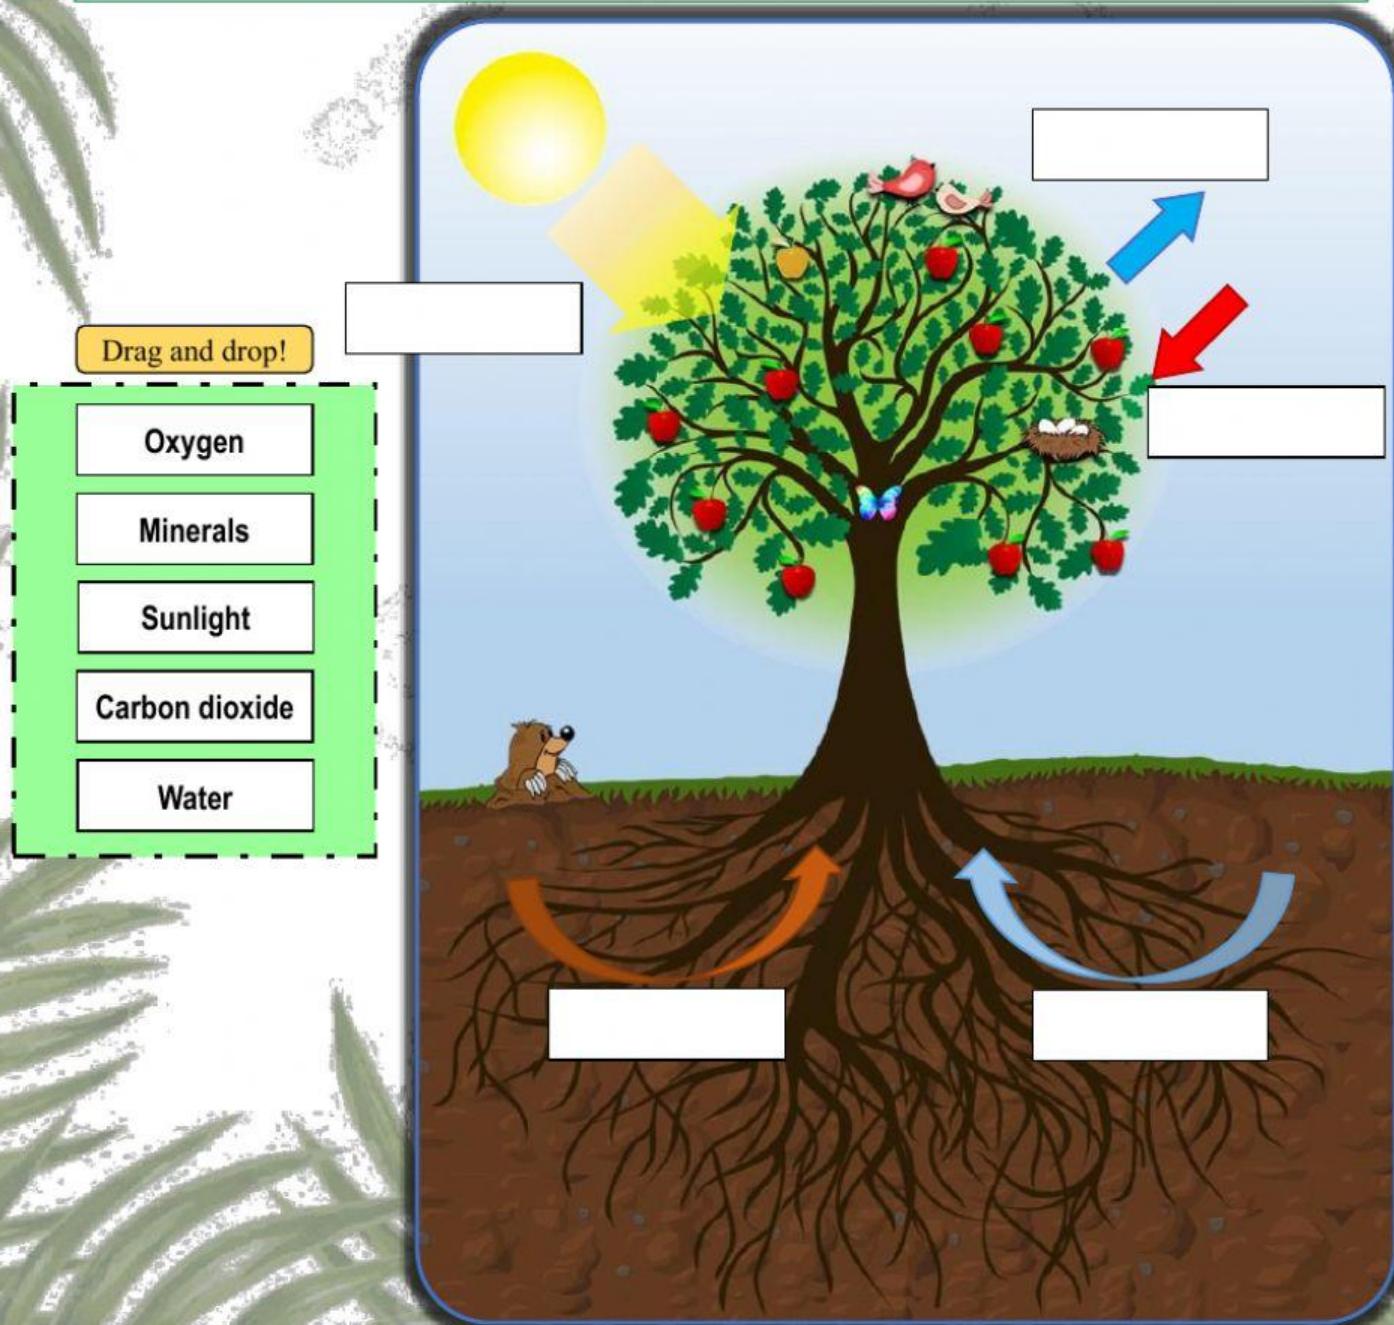

They **absorb** sunlight and carbon dioxide.

The roots **absorb** them.

Minerals and water **pass through** it.

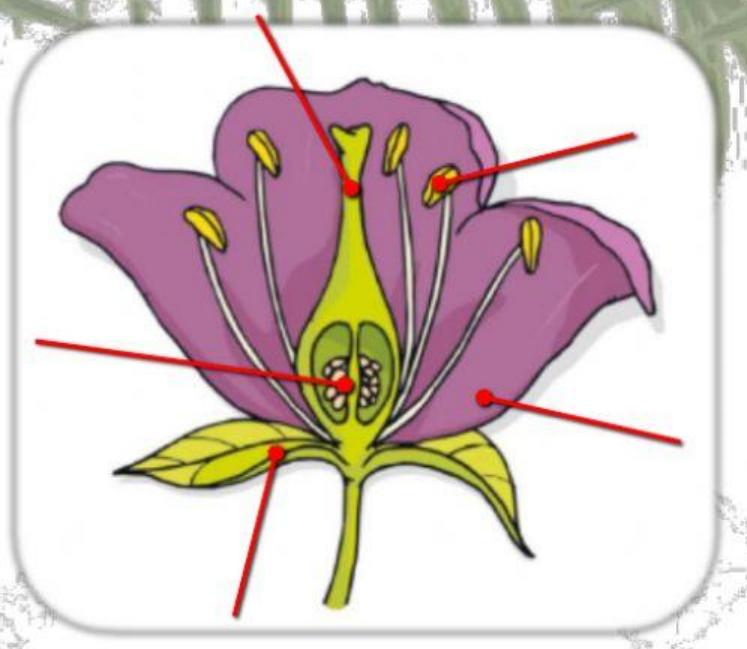

11

Complete the diagram about the process of photosynthesis

12

Label the different parts of a flower.

13

Match the parts of the flower with the function they do.

- Stigma**
- Stamens**
- Corolla**
- Calyx**
- Pistil**

- It is made of **sepals** and protect the flower.
- It is the **female reproductive organ** and has **ovules** inside.
- They are the **male reproductive organs** and produce **pollen**.
- It receives the pollen from other flower.
- It is made of **petals** and **attract** insects.

14

Look at the pictures and write animal or wind pollination.
