## The future of shopping

So, what <sup>1</sup>**will shopping be** (shopping/be) like in the future? I think we <sup>2</sup> \_\_\_\_\_ (do) ALL our shopping online. People <sup>3</sup> \_\_\_\_\_ (not need) to go out to shops. For food – our fridge <sup>4</sup> \_\_\_\_\_ (tell) our computers what we need. We <sup>5</sup> \_\_\_\_\_ (not have to) do anything! Robots <sup>6</sup> \_\_\_\_\_ (drive) the food to our houses. But <sup>7</sup> \_\_\_\_\_ (robots/choose) our clothes too? No, I don't think they <sup>8</sup> \_\_\_\_\_. We <sup>9</sup> \_\_\_\_\_ (go) online, choose our clothes and then we <sup>10</sup> \_\_\_\_\_ (see) a picture of ourselves in the jeans or dress on our screens and we <sup>11</sup> \_\_\_\_\_ (decide) to buy or not to buy! So, in the future there <sup>12</sup> \_\_\_\_\_ (not be) any sales assistants, just lots of robots.
