

READING VS CLOZED TEST

Today, smartphones are everywhere and can be found in many places like homes, offices, shops, and schools. People depend on smartphones so much that they get upset and have trouble when their phones are not working. Smartphones are now used for many things, from checking emails to navigating places.

Modern smartphones are much faster, cheaper, and smaller than older ones. Many smartphones are so small that they can fit in your pocket. With smartwatches and **portable** devices, users can stay connected and access information from almost anywhere easily.

In the future, smartphones will be even smaller and faster. **They** might have advanced features like voice recognition or facial recognition and could be as tiny as a coin. This will make it easier for people to use their phones for managing data from calls, messages, and online activities. New technologies such as smart glasses and foldable phones are already being developed today.

1. Why do people get upset when their smartphones stop working?
 - A. Because people depend on smartphones.
 - B. Because they dislike smartphones.
 - C. Because smartphones are too cheap.
