TAKING CARE OF THE ENVIRONMENT

1. **Read and choose TRUE or FALSE for each statement**

HOW DO YOU TAKE CARE OF THE ENVIRONMENT?

Alexander Vela (16)

I try to protect the environment every day. First, I recycle paper, plastic, and glass at home. Also, I reuse bags and bottles instead of buying new ones. In addition I turn off electronic devices when I'm not using them. However, I don't throw trash on the street, and I don't step on plants in the park.

Angela Ramirez (15)

I care about the environment and try to do my part. I recycle paper and plastic at school. Also, I use my cloth bags every time I go to the market. I even help my parents turn off the lights and electronic devices at night. But I don't throw trash in nature, and I never step on plants.

Yadhira Rojas (16)

I believe small actions can help the planet. That's why I reduce plastic as much as I can. In addition, I always water the plants in our garden. I also plant trees in my school's green area. But I don't take long showers and I don't pick up flowers because i know that plants are important.

Julian Pacheco (16)

To take care of the environment, I do a few simple things. I always take short showers to save water. Also, I make sure to turn off the taps while brushing my teeth. I use LED light bulbs because they save energy. On the other hand, I don't drink bottled water every day, and I don't use aerosol spray at home.

1. Alexander recycles different materials at home. **True** **False**
2. Julian uses energy-saving light bulbs and avoids wasting water. **True** **False**
3. Angela steps on plants and turns off electronic devices. **True** **False**
4. Yadhira takes long showers and doesn't reuse plastic bottles. **True** **False**
5. Angela participates in eco-friendly habits at home and at school. **True** **False**
6. Julian doesn't save water and still uses aerosol sprays. **True** **False**
