21. A. under	**B.** behind	**C.** beside	**D.** between
22. A. scared out of	**B.** scared to	**C.** scared from	**D.** scared about

IV. Read the following flyer for Urban Farming. Decide whether the statements from 23 to 26 are True or False and choose the correct answer (A, B, C, or D) to complete the statements in the questions 27 and 28. (1.5 pts)

Growing the Future in Cities

- Urban farming is revolutionizing how we think about food production in cities. This innovative approach transforms unused spaces like rooftops, balconies, and vacant lots into productive gardens, providing fresh produce for local communities. Studies show that urban farms can produce up to 20 times more food per acre than traditional rural farms.
- In New York City alone, over 550 community gardens produce approximately 87,000 pounds of food annually. These urban farms don't just provide food – they create jobs, reduce carbon emissions from food transportation, and help manage stormwater runoff. Research indicates that urban farming can reduce a city's carbon footprint by up to 34% through decreased transportation needs.
- Moreover, urban farms serve as educational centers where children learn about nutrition and sustainable agriculture. They've been shown to improve mental health, with 89% of participants reporting reduced stress levels after engaging in community gardening activities. The practice also helps combat urban heat islands, as green spaces can lower local temperatures by 2-4 degrees Celsius.
- Looking ahead, experts predict that urban farming could provide up to 180 million metric tons of food globally by 2030, meeting about 10% of urban food needs. Cities worldwide are increasingly incorporating urban agriculture into their development plans, recognizing its potential for creating sustainable, resilient communities.

23. Urban farms produce less food per acre than traditional rural farms.

24. New York City's community gardens produce over 100,000 pounds of food annually.

25. Urban farming can reduce a city's carbon footprint by 34%.

26. Urban farms can decrease local temperatures by 2-4 degrees Celsius.

27. According to the text, what percentage of participants reported reduced stress levels after engaging in community gardening?

A. 34% **B.** 89% **C.** 20% **D.** 10%

28. Which of the following is NOT mentioned as a benefit of urban farming?

A. Job creation

LIVEWORKSHEETS

B. Stormwater management

C. Increased property values
