

Identify the Past Tense Verbs in the Paragraph Below

Hi, I'm Muhammad Yusup. Today is my first day working as a driver for the Gojek app. I started at 7:00 a.m. when the app was opened, and got my first order, which was to deliver food. There was no difficulty with the first delivery until I reached the ninth one. There was a problem where a customer marked the wrong delivery point. Of course, this was a disadvantage for me, because it affected the delivery fee, which should have been more expensive. But, never mind — maybe it was their first time using an online app. Besides, it only happened once. By 6 p.m., I decided to take a rest. The earnings were quite good for a beginner like me. Alhamdulillah.
