

Homework

 13 ☆ Listen to a radio interview about the future of travel. Put the things (a–e) in the order they are mentioned.

- a changing destinations
- b electric vehicles
- c the environment
- d space travel
- e the use of technology

 13 ☆☆☆ Listen again and choose the correct alternative.

- 1 Travel experts accurately predicted/didn't predict all the changes in travel in the decade prior to 2020.
- 2 Gillian Morris says that AI will/won't have improved when it comes to providing a better experience.
- 3 Dr Schmidt thinks that technology makes booking business travel less/more convenient.
- 4 According to Justin Francis, the way/where we travel will change because of concerns about the environment.
- 5 Justin Francis predicts that companies will/won't pay more tax on aviation fuel in the future.
- 6 Dr Schmidt thinks that, by 2035, space tourism could be fairly normal/unusual.

Which of these predictions do you think Dr Schmidt will agree or disagree with?

- 1 Our experience of using technology to book holidays will improve.
- 2 Fewer people will travel to destinations that are already very crowded.
- 3 By 2030, space tourism won't be unusual.
