Tra ID Đề [5835] - Tra HD Video [5836]

There are many factors that can cause an animal or plant species to become endangered, and one big one is the (1) _____ of their habitats. Deforestation and soil, air, and water pollution are usually the main (2) _____. For example, the population of critically endangered Sumatran orangutans is now less than 10,000 on their home island of Sumatra, Indonesia, (3) _____ deforestation and farming. Another cause of endangerment is from humans exploiting wild animals. Uncontrolled hunting of whales in the last century, for example, resulted (4) _____ many whale species becoming critically endangered. The high demand for animal parts stems from their use in certain foods or medicines or their value as decorative objects. For example, the ivory tusks of elephants are used to make jewelry, and the price is high enough that people (5) _____ to go after these animals.
