

Group 2- Hazza Al Mansoori: The First Emirati in Space

Hazza Al Mansoori was born on September 13, 1983, in Al Wathba, a small village in Abu Dhabi, United Arab Emirates. From a young age, he dreamed of flying and reaching the stars. His passion for aviation led him to join the UAE Armed Forces, where he trained to become a military pilot. Through hard work and determination, Hazza became a skilled fighter pilot in the UAE Air Force.

In 2018, his dream took a giant leap forward when he was selected to join the UAE Astronaut Program. It was a historic moment for the country. On September 25, 2019, Hazza made history by launching into space aboard the Soyuz MS-15 spacecraft. He spent eight incredible days on the International Space Station, becoming the first Emirati astronaut to live and work in space.

Hazza returned to Earth on October 3, 2019, but his space journey didn't end there. In December 2020, he was named the operations manager of the UAE Astronaut Office. Today, he works to support and inspire the next generation of space explorers. Hazza's story is a powerful example of how dedication and courage can turn dreams into reality.
