

PASSAGE 64

Tra ID Đề [5996] o Tra ID Video [5997]

Air pollution is a serious problem in many cities. Motor vehicles, factories and other sources create so much air pollution that it may hang in the air like dirty fog. Air pollution threatens the health of the people who live in cities. City wastes cause water pollution when it is poured into the waterways. These wastes kill fish and make some areas unfit for swimming. In addition, many large cities have difficulties in disposing of their garbage. The amount of garbage grows each year, but places to put **it** are quickly filling up. Citizens, governments, industries, scientists, and businesspeople must work together in different ways to gradually reduce pollution. For example, most cities have introduced recycling programs, which cut down on garbage and the space needed to store it. Residents **separate** recyclable products from their garbage, and city governments provide drop-off cities or pick up the products from homes.

Question 1: What is the main idea of the passage?

- A. Air pollution is a serious problem in all cities.
- B. Air pollution is a serious problem in countries.
- C. Air pollution is a serious problem in many cities.
