According (4) _____ Professor Marvin Burnham of the New England Institute of Technology, we have to start conserving coal, oil, gas before it is too late; and nuclear power is the only alternative .

Part 7: Read the following passage and decide if the statements that follow are TRUE or FALSE. (1.0 m)

One of the most important discoveries of the nineteenth century was a method of using natural gas for cooking and heating. Large amounts of natural gas found in the United States, were usually several thousand feet below the surface of the earth. For many years after natural gas was first discovered, it was thought to have no value. Finally, however, people began to understand its uses and to find ways of storing it and of moving it from place to place. Today natural gas is stored in large tanks and used for lighting, cooking, and heating. In many ways, natural gas is one of our finest fuels. It is cheap and can be used for cooking without making the room hot. It can be moved easily from one place to another through long pipelines, some of which are hundreds of miles in length.

1. Natural gas was first used for only heating in the nineteenth century.
2. Today natural gas is stored in large tanks.
