A Journey into Space

Last night, Alex had a strange dream. He was an astronaut on a mission to explore space. He wore a white spacesuit and floated inside a spacecraft. Through the window, he could see stars, planets, and even the moon.

Suddenly, the spacecraft landed on a red planet — Mars! Alex stepped out and looked around. The ground was dry and dusty. There were no trees, no water, and no people.
He used his telescope to look at the galaxy. It was full of bright lights and strange shapes. Then, he saw a small green alien! The alien waved and smiled. Alex was scared at first, but the alien was friendly.

They talked using a translator and shared stories. The alien gave Alex a special rock from Mars. Then, it was time to go back. Alex got into the spacecraft, and suddenly —ring! ring!—his alarm clock woke him up.
It was all a dream...

Comprehension Activities.

Answer the Questions.

- Who is the main character? _____
- What was Alex wearing in his dream? _____
- Where did the spacecraft land? _____
