

An anatomical diagram of the human respiratory system. It shows the trachea (windpipe) with blue and white stripes, branching into the bronchi (wavy blue lines) which lead to the lungs (red, textured). Green arrows indicate the flow of air: inhaled air enters through the nose and mouth, travels down the trachea, and branches into the lungs. Exhaled air leaves through the nose and mouth. There are five empty rectangular boxes for labels: one at the top, one next to the trachea, one next to the bronchi, one next to the lungs, and one at the bottom.
